### Additional Backup Information

This purchase is to rehabilitate a 2-stage vertical turbine pump and base at Ullrich Low Service (raw water) Pump Station. The LSPS-001 pump was installed in 1986 to pump 40 million gallons per day of raw water from Lake Austin to the Ullrich Water Treatment Plant. This pump is currently out of service and the components need to be inspected and replaced. Rebuilding this pump should extend its service life, and is less expensive than replacing the pump with a new unit
